How are personal research activities reflected in teaching activities?	Teaching and researching are two essential components of academic, and they play significant roles in the field of education, particularly in higher education institutions like universities and colleges. Teaching and researching are two significant extent inter-connected. While teaching, I observe, assess, provide feedbacks and evaluate. These steps allow data collection for subsequent analysis to gather evidence-based understanding for making necessary continuous improvement. Based on some research I conducted, clear rules, clear instructions, group works and peer assessments are important features of an effective classroom management.
