Activities in the Areas:	
- Further Education	
- Research	Determinants and Impacts of Virtual Group Homophily and Tie Strength on Learning Resource Sharing and Collaborative Learning in Indonesian Private Universities
- Consultancy	Guiding students in conducting their research projects and Bachelor's thesis
How are personal research activities reflected in teaching activities?	Teaching and researching are to a significant extent inter-connected. While teaching, I observe, assess, provide feedbacks and evaluate. These steps allow data collection for subsequent analysis to gather evidence-based understanding for making necessary continuous improvement. Based on some research I conducted, clear rules, clear instructions, group works and peer assessments are important features of an effective classroom management I successfully apply in my classrooms. They are required to create a learning environment that is conducive, encouraging and also well-controlled as expected.

Work experience:	
- General	Web Developer (2003-2023)
- Activities as an Expert:	Delivering trainings and workshops on web programming education, and Drone Professional as an Instructor
